

Get Elected

The AI Campaign Manager.

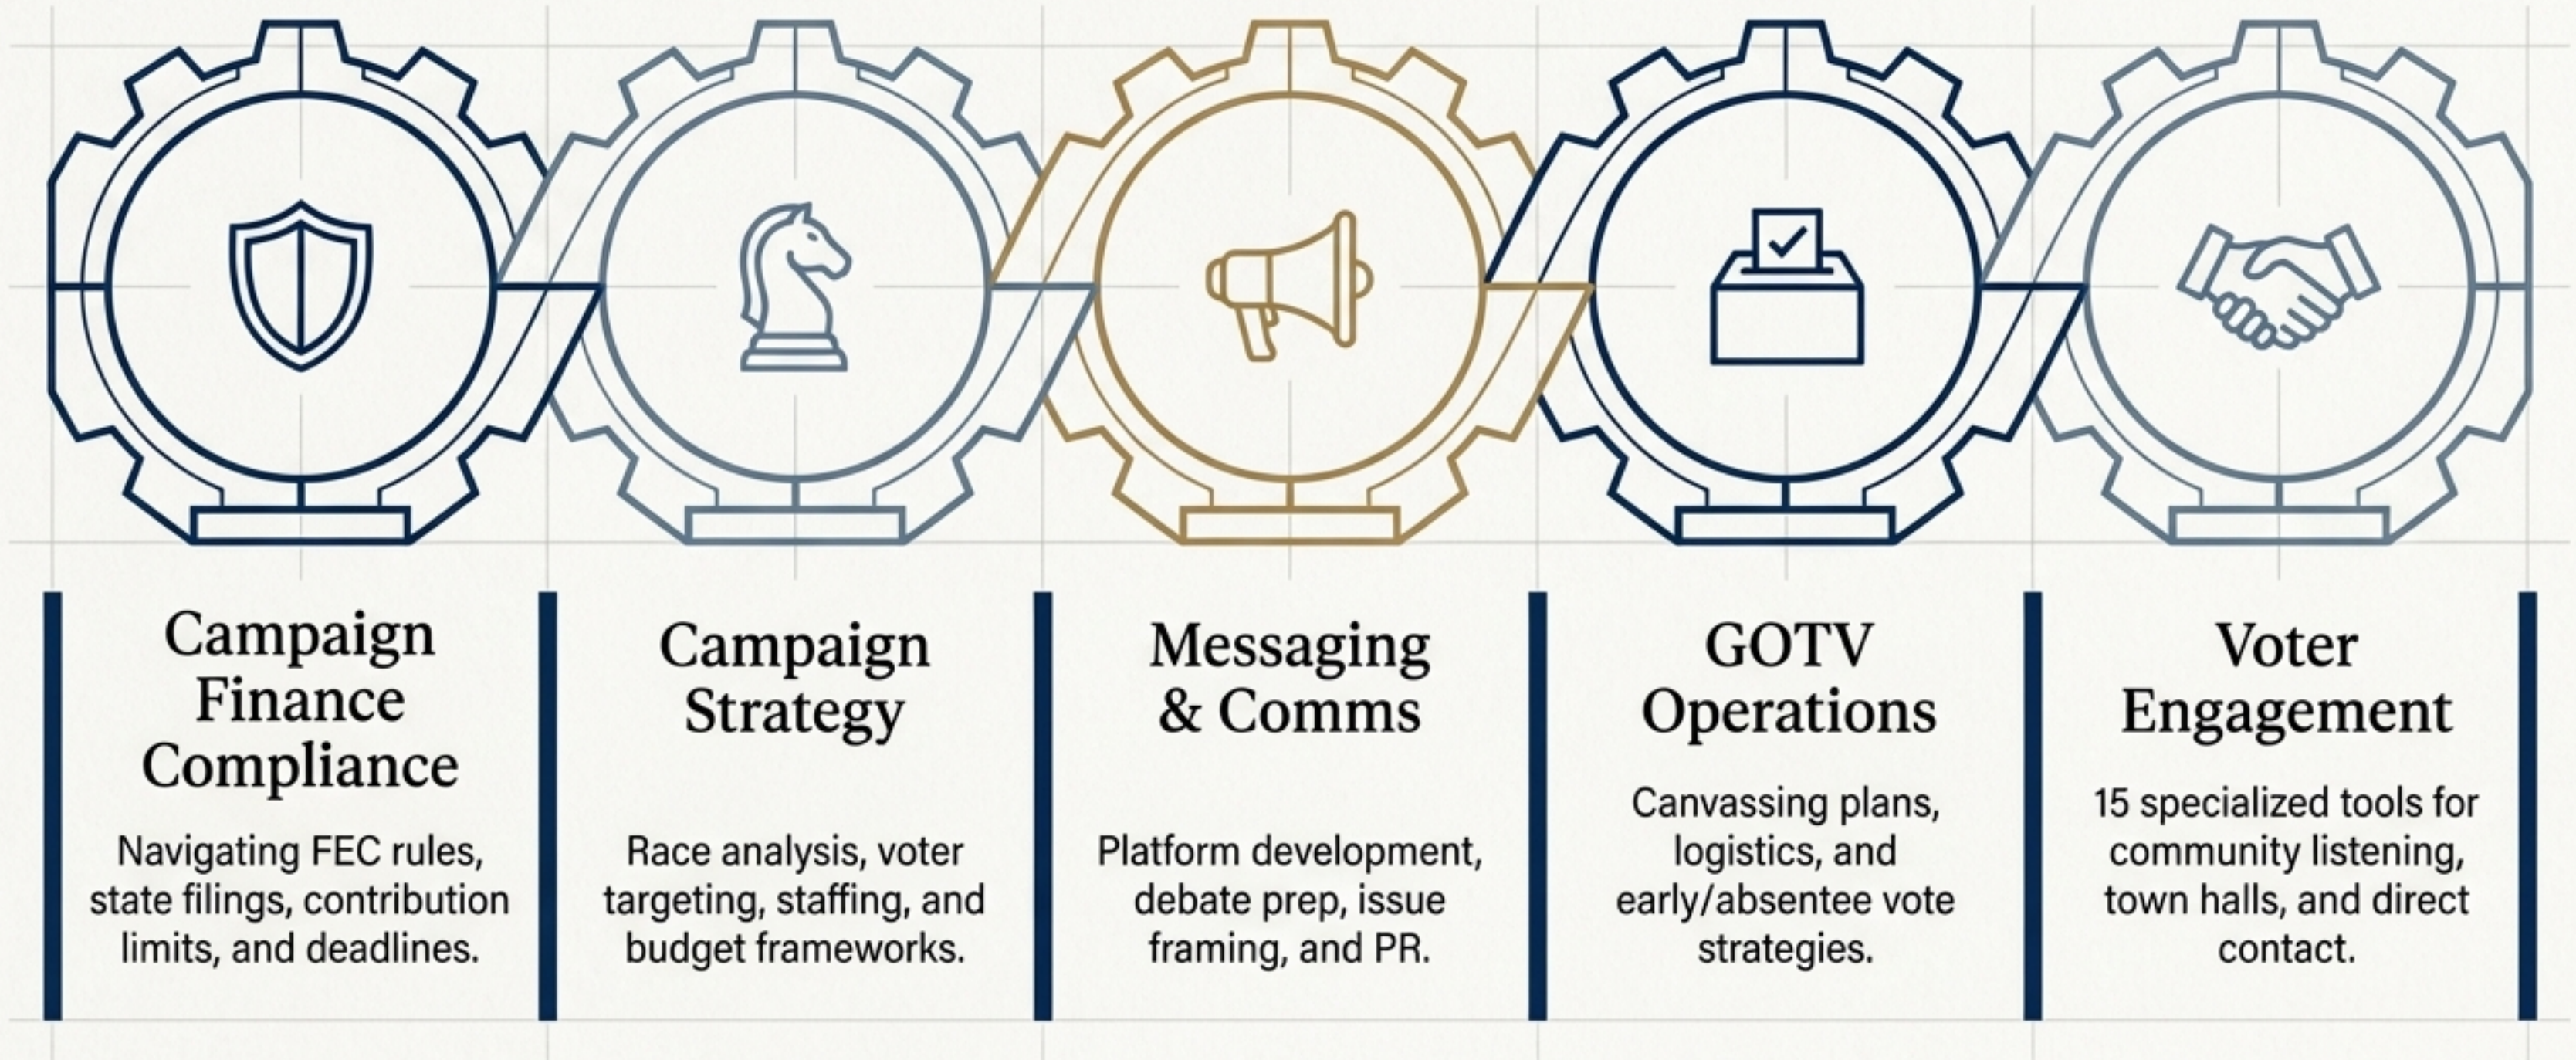

A Claude AI Skill for running legally compliant, strategically sound campaigns for public office – from school board to Congress.

Bridging the gap between the everyday citizen and public office.

Running for office requires specialized knowledge that is often gatekept by expensive consultants. Get Elected acts as a comprehensive, always-on campaign assistant, democratizing access to the strategic, legal, and operational expertise needed to run a successful campaign.

A structured campaign engine divided into five operational pillars.

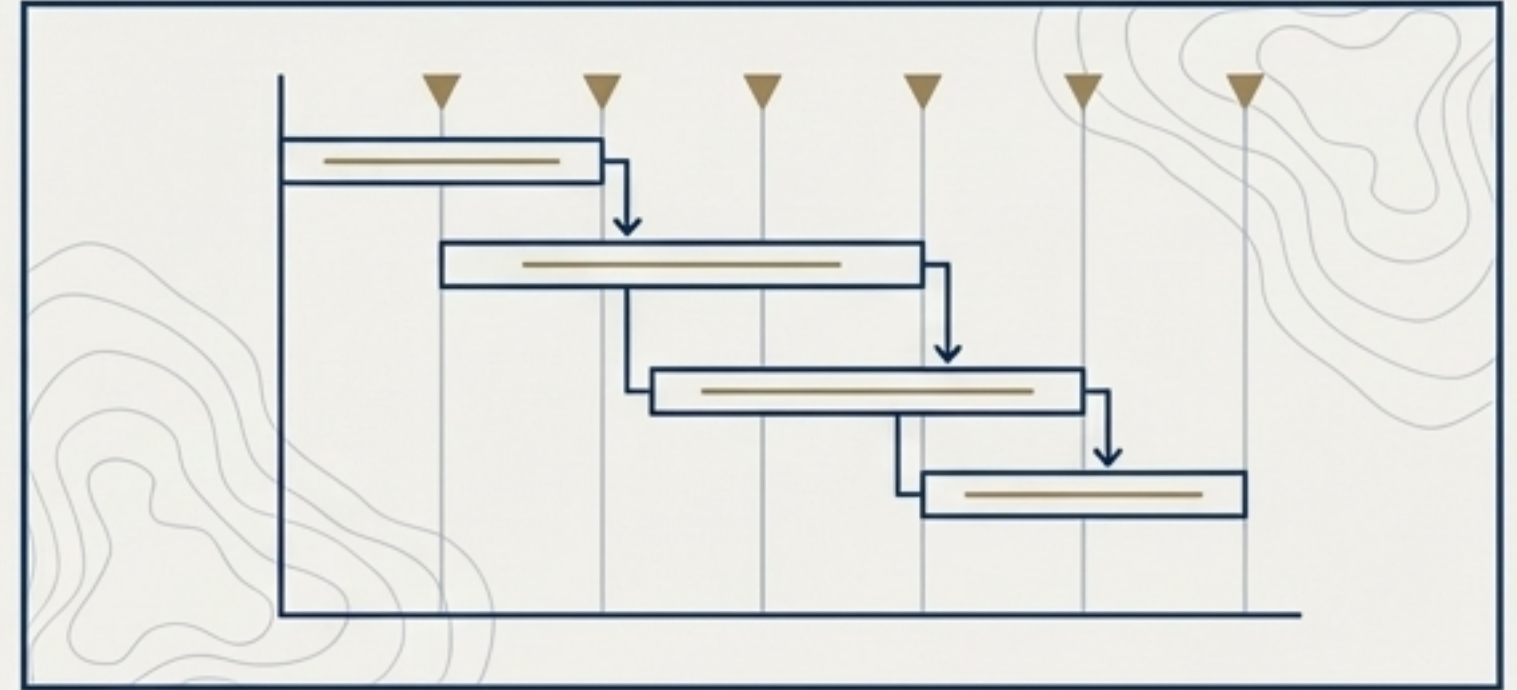

The Back Office: Establishing strategy and ensuring legal compliance

Campaign Finance & Legal

The AI structures the bureaucracy: Federal FEC rules, state-specific filing requirements, contribution limits, disclosure deadlines, and strict reporting obligations.

Race Architecture

The AI builds the framework: District race analysis, sophisticated voter targeting, step-by-step timeline planning, staffing structures, and tailored budget models for specific offices.

The Frontlines: Shaping the narrative and turning out the vote.

Communications

From foundational platform development to rapid response. Capabilities include drafting stump speeches, organizing debate preparation materials, issuing press releases, and framing complex local issues.

Get Out The Vote (GOTV)

Executing the ground game. The AI generates targeted canvassing plans, localized phone bank scripts, poll watcher coordination guides, and rigorous Election Day logistics.

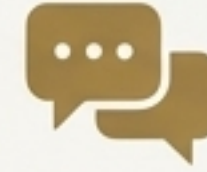

Fifteen interactive tools designed for genuine voter engagement.

Frameworks

Tools focus on building physical, community-level connections rather than strictly digital campaigning.

Two modalities for interaction: Natural conversation or rapid command execution.

Conversational triggers automatically detect campaign-related questions and guide novices step-by-step.

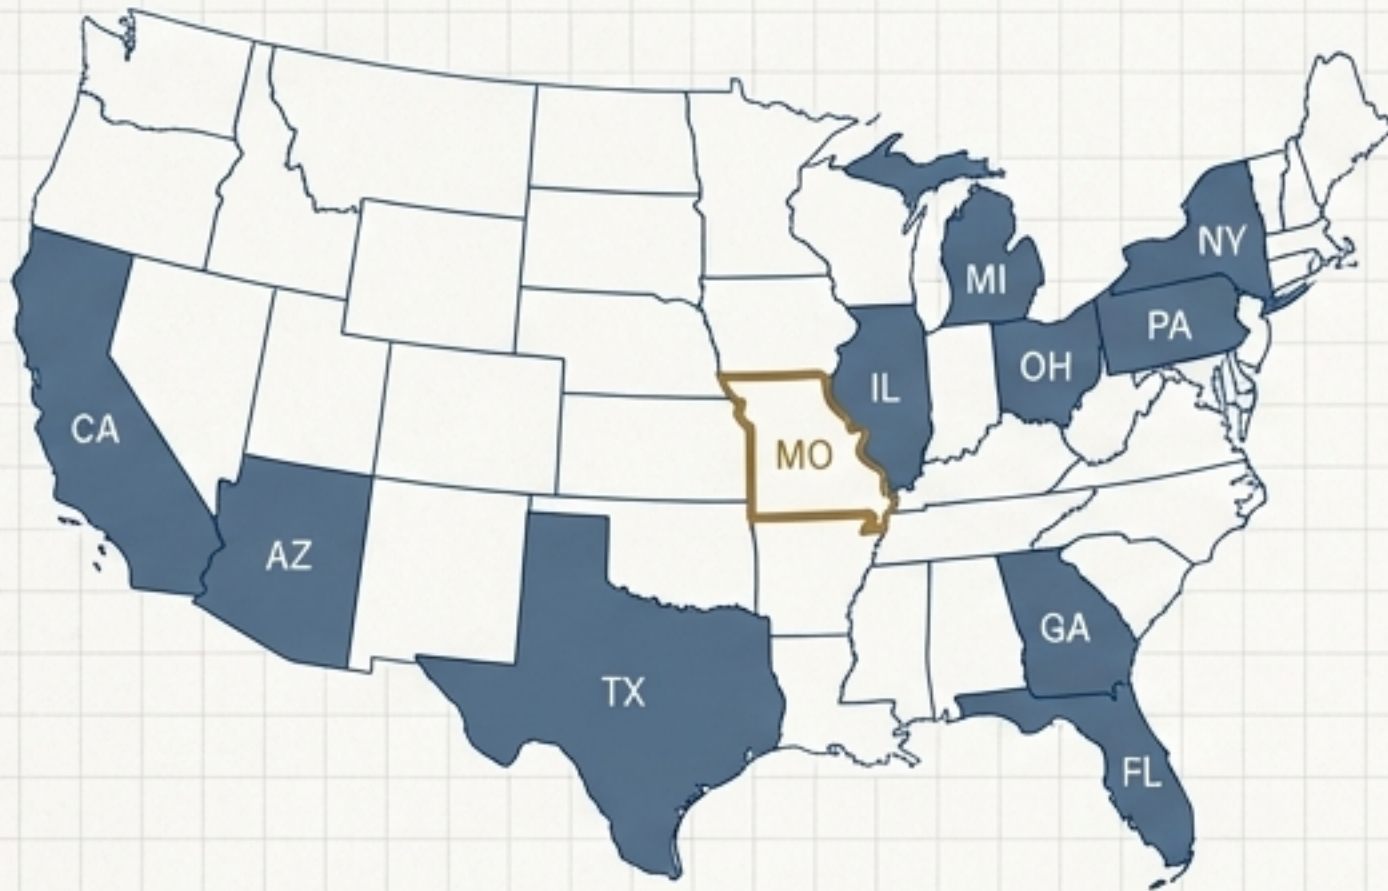

Power-users can bypass conversation entirely using slash commands for instant artifact generation.

An arsenal of over 80 slash commands for instant artifact generation.

Current jurisdictional coverage spans federal mandates and 11 core states

Federal Level (All 50 States)

Full application of Federal election law and FEC compliance guidance.

Model State (Missouri - MO)

Exhaustive coverage. Every office level, filing deadline, contribution limit, and compliance requirement meticulously mapped.

Core Coverage (AZ, CA, FL, GA, IL, MI, NY, OH, PA, TX)

Sufficient mapping of major requirements, state election law, and basic filings to guide candidates through the core campaign process.

Four uncompromising ethical guardrails protect the integrity of the campaign.

Nonpartisan.

Serves candidates of any party or no party. Strictly prohibits advocacy for any specific political ideology or candidate.

Educational Only.

Designed to help citizens participate in democracy. It is not a substitute for professional counsel.

No Invented Law.

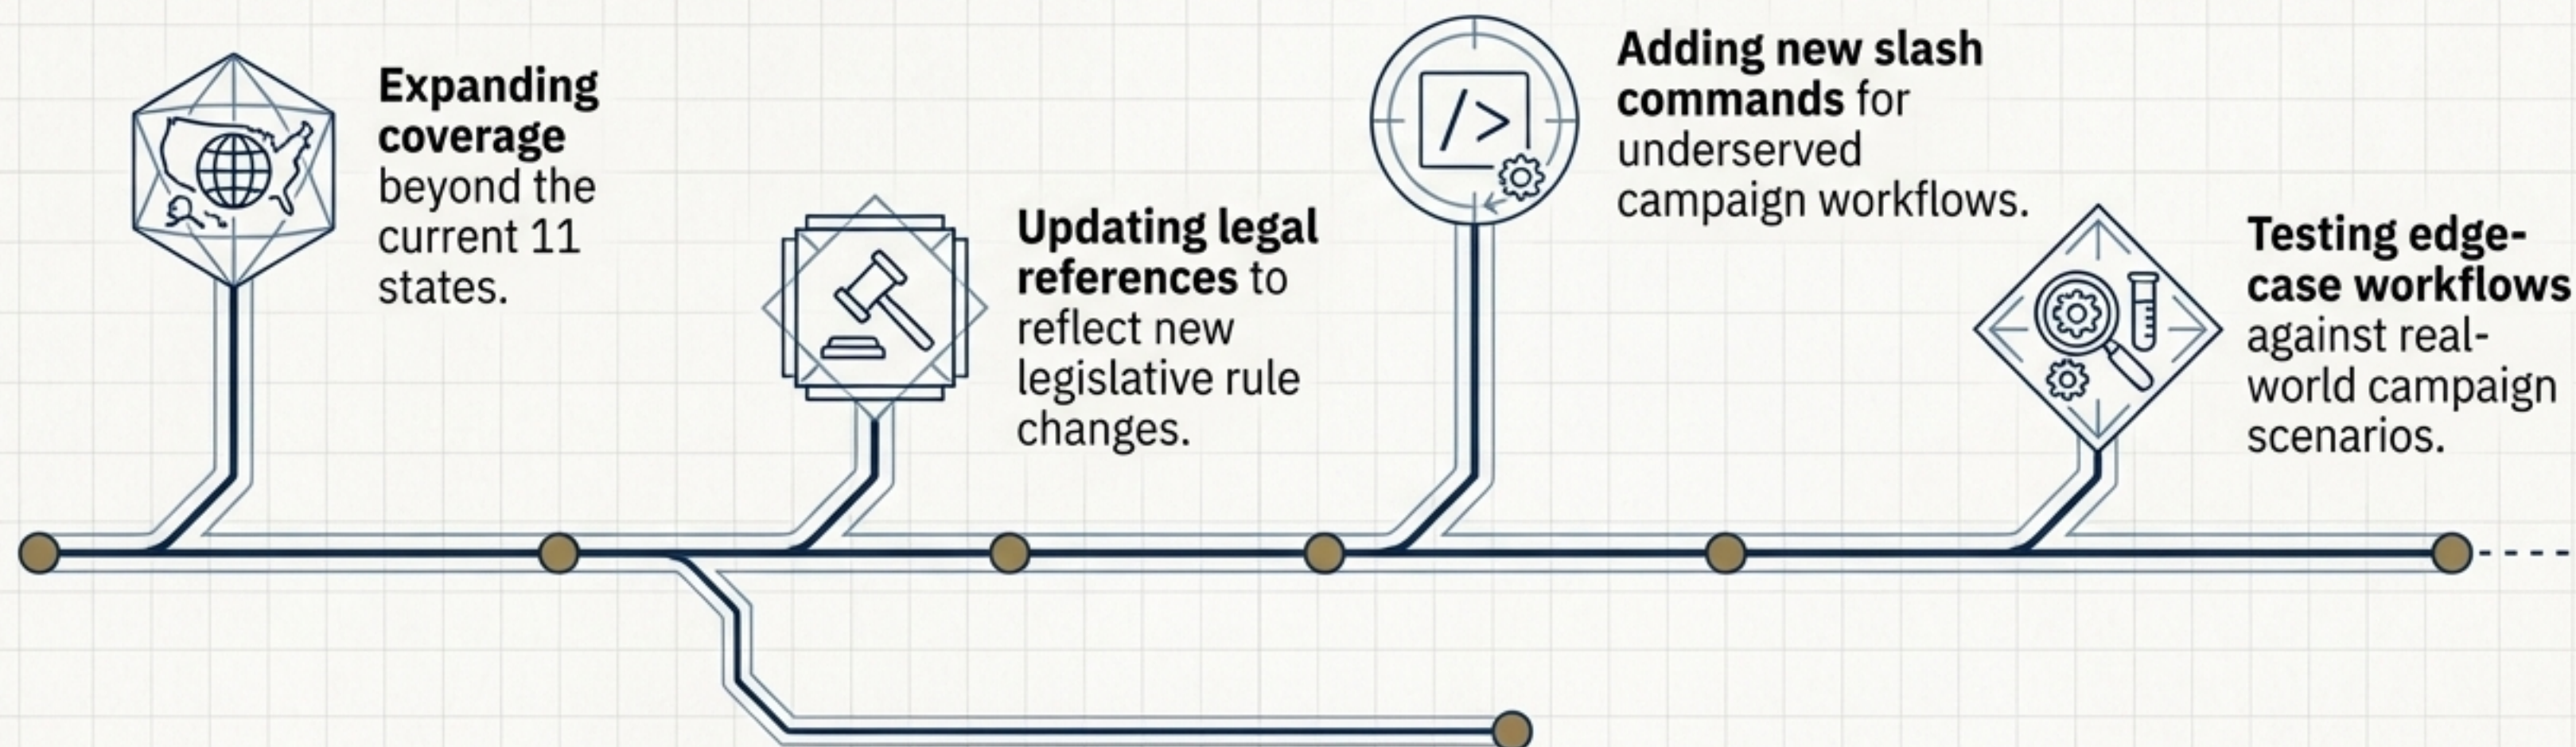

All compliance data is grounded in referenced source material. The system will never hallucinate statutes or regulations.

No Dark Arts.

Hard-coded refusal to assist with voter suppression, disinformation, illegal coordination, or unethical practices.

Open-source civic technology relies on community contributions.

Get Elected is licensed under the MIT License. To build a more robust democratic infrastructure, we require ongoing contributions to the repository.

Educational foundations, not professional legal counsel.

Get Elected provides educational information only and does not constitute legal advice. Campaign finance law, election law, and filing requirements vary heavily by jurisdiction and change frequently.

Always consult a qualified attorney, your state or local election authority, or the Federal Election Commission for authoritative guidance specific to your race. Use of this skill does not create an attorney-client or professional advisory relationship.
